

Stop Massive Development in Front of Coyote Hills Regional Park!

A proposal for a massive development is entering its final stages of approval. This development would add 520 housing units to the Ardenwood area. Along with the 276 high-density housing unit Tupelo log development, the project would bring in over 3000 new residents and add 3.2 million car trips annually to our streets. All of this development would be right in front of our beloved Coyote Hills Regional Park. Our school system CANNOT afford this!

A survey showed that over 70% of Fremont voters oppose a large development at this site. This is the wrong development and this is the wrong time to lock ourselves into a long-term deal. **You can help stop this.** We ask you to:

- **Sign up** for email updates at Friends of Coyote Hills at www.ProtectCoyoteHills.org; or contact us at: info@fchf.org/ (510) 793-5329
- **Donate** to help hire technical experts (send checks made out to "Friends of Coyote Hills" to Ann Rice, FCH Treasurer, 37734 Second St., Fremont, CA 94536-2925)
- **Write** the Mayor and City Council members, who will vote on this proposal: <http://www.fremont.gov/index.aspx?nid=598>

Currently, the site is zoned to allow only 266 housing units. Tell the Council that they should not allow this additional development before it is too late! Let the City know why we don't want massive development in front of Coyote Hills Regional Park.

Patterson Development at Paseo Padre Parkway: 3-story bldgs. will block views of Coyote Hills

The negative impacts from this proposed project, along with the 276-unit high-density housing unit Tupelo lot development, would include the following:

- The children of 3000+ residents would further burden an overcrowded and underfunded school system. Our schools are already suffering from cuts to science, PE and computer teachers, counselors, and librarians. Class sizes already have increased and the school year shortened. Because of the school funding crisis, Fremont residents are being asked to approve a parcel tax in November.
- Add 3.2 million car trips annually to our city streets, degrading residents' quality of life and increase air and noise pollution.
- City services—police, fire, street maintenance—are already cut. Do we need 520 more housing units and thousands more residents?
- Destroy scenic views of Coyote Hills Regional Park and a buffer for the park's wildlife.

- Degrade water quality.
- The proposed housing site's soil is at high risk of liquefaction in an earthquake. The area is prone to flooding, which could worsen with sea level rise. Should Fremont put taxpayers at risk of bailing out another development scheme doomed to failure?

Proposed Patterson Ranch Development
